

(a) Ordered event groups used for the sequence comparison

DTW aligns matching event groups; the additional phase call remains flagged.

(b) Timing comparison after the event groups are aligned

(c) Alignment table separating sequence and timing findings

Aligned order	Reference group	Candidate group	Result
1	Phase 2 green + Overlap A green 0.0 s	Phase 2 green + Overlap A green 0.2 s	Sequence match; 0.2-s shift
2	Phase 2 yellow 4.0 s	Phase 2 yellow 4.4 s	Sequence match; 0.4-s shift
—	—	Phase 6 call 6.1 s	Additional candidate event
3	Phase 2 red 8.0 s	Phase 2 red 8.5 s	Sequence match; 0.5-s shift
